# Gespikkelde patrone

## Teacher Notes

Learners repeat a dotted pattern of linked dots on the left onto the blank grid on the right.
In the beginning, the pattern should be simple and consist of only 2 or 3 lines.
Draw the connecting lines in a colour. Show the learner where to start by having them count the number of dots from a corner on the left. This exercise is excellent for visual memory, visual integration and figure-grounding skills.
