

**NEIMS (NATIONAL
EDUCATION
INFRASTRUCTURE
MANAGEMENT SYSTEM)
REPORTS MAY 2011**

CONTENTS:

1. BACKGROUND

- 1.1. **Introductions**
- 1.2. **Definitions**
- 1.3. **Photo examples of infrastructure**

2. Tables

- 2.1. **Table 1:** Summary of the number of public ordinary and special schools on their own site per province.
- 2.2. **Table 3:** Summary of the number of sites per province provided with electrification infrastructure. A site can have more than one type of source.
- 2.3. **Table 4:** Summary of the number of sites per province provided with water infrastructure. A site can have more than one type of water source, for example a borehole and municipal water connection.
- 2.4. **Table 5:** Summary of the number or sites per province provided with sanitation facilities. A site can have more than one type of sanitation facilities.
- 2.5. **Table 6:** Summary of the number or site and the type of fencing on the boundary of the site. A site can have a combination of different types of fence.
- 2.6. **Table 7:** Summary of the number of all the ordinary schools with own site indicating if a library is on the site and if it is stocked.
- 2.7. **Table 8:** Summary of the number of all the ordinary schools on own site indicating if a laboratory is on the site and if it is stocked.
- 2.8. **Table 9:** Summary of the number of all the ordinary schools with own site indicating if a computer centre for teaching and learning is on the site and if it is stocked.
- 2.9. **Table 10:** Detail list of the different facilities, indicating the number of rooms and the total size per type of room.
- 2.10. **Table 11:** Summary of the type of building material used for walls for administration and learning space. There can be more than one type buildings where different types of building material were used to construct walls.
- 2.11. **Table 12:** Detailed facilities of rooms type, their sizes and numbers per site

1. BACKGROUND

1.1. Introduction

National Education Infrastructure Management System (NEIMS) is a database of public schools derived from the first survey (School Register of Needs -SRN) conducted in 1996 and updated in 2000. Its Initial birth was in 2005 and completed in 2007. The project was funded by the Netherlands. Further enhancement was done by SITA to make the system to be more effective and user friendly.

Physical Planners in the provinces have been trained to conduct the assessments for the Department of Basic Education to update the system with current immovable infrastructure status of the public schools.

Province such as North West runs a team of inspectors to assess their provincial schools while other provincial departments such as KwaZulu-Natal, Limpopo and Western Cape are using service providers to assess schools and provide the Department of Basic Education with copies of the assessment forms for updating the System.

Provincial departments report quarterly on progress made on their completed projects using the standard assessment forms for processing by the Department of Basic Education. The provincial departments are also required to report quarterly on schools closed and merged.

This report is based on the infrastructure provided to each site from 2009 to March 2011 especially for KZN province as their assessment forms have been received and captured. Other Provinces we only updated schools that are merged and closed.

1.2. Definitions

NEIMS - National Education Infrastructure Management System

EMIS - Education Management Information System

School Site - Refers to the actual physical location of a school. It also entails the total space a school is required to adequately accommodate all its facilities.

School - A public school or an independent school which enrol learners in one or more grades from Grade R (reception) to Grade 12.

Learner with Special Education Needs (SNE)

Special Needs Education - Education that is specialised in its nature and addresses barriers to learning and development experienced by

learners with special education needs (including those with disabilities) in special as well as ordinary schools.

Special schools - Schools resourced to deliver education to learners requiring high-intensity educational and other support on either a full-time or a part-time basis. The learners who attend these schools include those who have physical, intellectual or sensory disabilities or serious behaviour and/or emotional problems, and those who are in conflict with the law or whose health-care needs are complex.

Ordinary school A school that is not a special school

Primary school - Institution that offers formal schooling between the range of Grades R to 7.

Public School - A school contemplated in Chapter 3 of the South African Schools Act 84 of 1996

Combined School - A school that offers a selection of grades between Grade R and Grade 12, but such a selection is not in line with the grade limits of either a primary or a secondary school.

Intermediate school - A school that offers a selection of grades between Grade R and Grade 12, but such a selection is not on line with the grade limits of either a primary or secondary school.

Secondary School - Institutions offering a lowest level of Grade 8 and a highest level of Grade 12. There are also institutions included in this group that offer only a selection of grades within these limits.

Platoon school A school with its own learners, staff, principal and EMIS number which uses the building and infrastructure of the host school.

Platoon sites are sites where:

- More than one school is using the same facilities, the host schools during the morning and another school (platoon school) during the afternoon. The platoon school has no facilities and is in need for own site and school buildings.
- More than one school on the same site sharing facilities during normal school hours, which implies that sufficient facilities are available to accommodate more than one school on the same site.

1.3.Photo examples of structures

1.3.1. Electrification of sites

Grid electrification

Solar

1.3.2. Water facilities on sites

1.3.2.1. Municipal water supply to a site

1.3.2.2. Borehole on site

1.3.2.3. Rain harvesting on site

1.3.2.4. Portable water / tanker on site

1.3.3. Sanitation facilities on site

1.3.3.1. Buckets on site (to be noted that this includes chemical toilets, attached examples of chemical toilets)

1.3.3.2. Pit latrines on site

1.3.3.3. VIP- pit latrine with ventilated pipe at the back of the toilet

1.3.3.4. *Enviro loo on site*

1.3.3.5. Flush toilets connected to municipal sewage system or to a septic tank.

1.3.4. Fencing on site

1.3.4.1. Concrete palisade and brick wall as fencing on site

1.3.4.2. Steel palisade fence on site

1.3.4.3. Wire fencing on site

1.3.5. Sport facilities on site

1.3.5.1. Paved area used as combi court on site

1.3.5.2. Soccer field on site

1.3.5.3. Netball and tennis facilities on site

1.3.5.4. Hockey and cricket facilities on site

1.3.5.5. Athletics facilities on site

1.3.6. Building material used as walls for buildings

1.3.6.1. Mud / clay used as building material on site

Modern technology face brick and mud/clay bricks

Making of mud / clay bricks Northern Cape

Traditional mud structures

1.3.6.2. Face bricks used as building material on site

1.3.6.3. Other type of building material used for walls on site

1.3.6.4. Plastered brick used as building material on site

1.3.6.5. Other types of brick used as building material for walls on site

1.3.6.6. Metal used as building material for walls on site

1.3.6.7. Prefabricate building material used as walls on site

1.3.6.8. Wood used as building material for walls on site

Inside view of wood structures

1.3.6.9. Mobile classrooms, there are different types of building material used for this type of classroom.
