INTRODUCTION

A. What is Office Practice?
Office Practice equips students with the skills, knowledge, values and attitudes required to be successful as an administrative, secretarial or personal assistant. The subject lays the foundation for lifelong learning and creates the opportunity for further and higher education.

Office Practice is designed to give students relevant and marketable skills and applied competencies for employment and self-employment in the office administration sector. Administration competencies apply to all industries, both in the formal and informal commercial sectors and the non-commercial sector. Office Practice simultaneously builds the cognitive ability and provides the required fundamental learning necessary to access employment in the business and administration sector and related studies at further and higher education level with enhanced employment opportunities.

B. Why is Office Practice important in the Office Administration programme?
A sound knowledge of business practice will serve students as a usable foundation in an office environment. The subject prepares students for the world of work in general and for performing office functions in particular. The practical components of business practice will increase students’ competence levels in such a way that they will be productive in positions for which office skills are required.

Students will acquire the skills to work in an administrative environment, including small, medium and micro enterprises, where the acquisition of competence will add value to the student’s job performance or increase the student’s chances of finding employment.

C. The link between the Office Practice Learning Outcomes and the Critical and Developmental Outcomes
In Office Practice, students develop the skill to plan before commencing any work. Students learn to understand and adapt to the social environment by meaningfully interpreting office practices which they will come across in their future lives. They develop the logical thought processes so that instead of relying on set rules, they are able to apply basic office principles to new and unfamiliar situations. Students also develop a systematic approach to problem solving.

D. Factors that contribute to achieving the Office Practice Learning Outcomes
Students interested in commerce or the business world will benefit by doing Office Practice. This subject is focused on the skills necessary for the office or personal assistant function of any business and is essential for any student exploring management as a future career opportunity. Students will acquire the core skills of handling information, technology and communication and secretarial skills, practices and procedures in a business environment. Students will also develop the ability to communicate effectively in an office environment and the ability to be creative and people-centred in an office environment.

Students who have specific characteristics such as thoroughness, accuracy and orderliness will enjoy Office Practice.
1 DURATION AND TUITION TIME
This is a one year instructional programme comprising 200 teaching and learning hours. The subject may be offered on a part-time basis provided all of the assessment requirements.
Course preparation should consider students with special education needs.

2 SUBJECT LEVEL FOCUS
The general/overall aim of the subject at this level is to equip students with the necessary skills to function effectively in the business environment.

3 ASSESSMENT REQUIREMENTS
3.1 Internal assessment (50 percent)
3.1.1 Theoretical Component
The theoretical component of Office Practice will form 40 percent of the internal assessment. Weekly assessments are necessary on all theoretical work and this can be done by short assessments that can be incorporated into the year mark. Short assessments are important but cannot replace the final of each topic or the semester assessment. The theoretical component can be assessed individually or in groups using a variety of assessment instruments.

3.1.2 Practical/Application Component
The practical component of Office Practice will form 60 percent of the internal assessment. All practical components must be indicated in a Portfolio of Evidence (PoE).
Practical assessment will be done in the simulated enterprise (SIM) and evidence will be placed in the PoE. Integration of practical and theory will be assessed throughout the year in the form of task case studies and practical application exercises.

- Some examples of practical assessments include, but are not limited to:
  - Presentations (lectures, demonstrations, group discussions and activities, practical work, observation, role play, self activity, judging and evaluation)
  - Use of aids
  - Exhibitions
  - Visits
  - Guest speaker presentations
  - Research
  - Structured environment

- Definition of the term “Structured Environment”
Structured environment for the purposes of assessment refers to an actual or simulated workplace, or workshop environment. It is advised that a practicum room is available on each campus for practical assessment.

- Evidence in practical/application assessments
All evidence pertaining to evaluation of practical work must be reflected in the students’ Portfolio of Evidence. The tools and instruments constructed and used for the purpose of conducting such assessments must be clear from evidence contained in the PoE.

3.1.3 Processing of internal assessment mark for the year
A year mark out of 100 is calculated by adding the marks of the theoretical component and the practical component of the internal continuous assessment.

3.1.4 Moderation of internal assessment mark
Internal assessment is subject to both internal and external moderation procedures as contained in the National Examinations Policy for FET College Programmes.
3.2 External assessment (50 percent)
A national examination is conducted annually in October or November by means of a paper/s set internally and marked and moderated externally.
Details in respect of external assessment are contained in the *Assessment Guidelines: Office Practice* (Level 3).

5 CALCULATION OF FINAL MARK

Internal assessment: Student’s mark/100 x 50 = a mark out of 50 (a)
Examination mark: Student’s mark/100 x 50 = a mark out of 50 (b)
Final mark: (a) + (b) = a mark out of 100

All marks are systematically processed and accurately recorded to be available as hard copy evidence for, amongst others, purposes of moderation and verification, as well as for purposes of reporting.

6 PASS REQUIREMENTS
The student must obtain at least fifty (50) percent in ICASS and fifty (50) percent in the examination.
